TIPATECH INSTALLATION ADDENDUM

Installation Tips

1. The Copper Vortexers are bidirectional.
2. The Copper Vortexers can be installed vertically or horizontally.
3. Install a shut off valve on the inlet and outlet side of the Tipatech to simplify changing Tipatech filter components.
4. **Carefully** read the Tipatech instructions included in the Tipatech box.

AquaValve Flushing Tips

- Set the Frequency dial to * and to the Duration dial to the #1 position. This programs the valve to flush the filter weekly for one minute.
- The clear vinyl drain hose is a 3/4" O.D. x 5/8" I.D. and attached to the Aqua Flush valve using a hose clamp.
- The drain hose can be directed to a floor drain, a laundry drain or through the wall to an outside location. An additional length of hose may be needed to reach your drain. Use a coupler with hose clamps to attach hoses.
